**BlitzDays Backordered Instrument Terms & Conditions:** To claim your BlitzDays discount on all backordered instruments, orders must be placed between 8:30am Thursday 25th August and 11:59pm Friday 26th August 2022. Orders received after these dates will not be honoured. Purchases of backordered instruments do not qualify for any other product or promotional offers not specified in these offers and no double dipping allowed. Online orders will be discounted at time of invoicing. Please allow 6 – 8 weeks for delivery of backordered instruments. No returns on BlitzDay Medesy Backordered Stock.

## MEDI-DENT TERMS & CONDITIONS

### Freight

A freight charge of \$16.50 including GST applies to all orders.

### GST

All prices include GST.

### Loan Equipment

Medi-Dent does not provide loan equipment.

### Offer and Acceptance

These Terms and Conditions replace all previous versions. Unless otherwise specified offers cannot be combined. All prices, bonuses and offers are subject to change without notice and are available for the duration of the promotional period or while stocks last, no further discounts apply. Where an error or omission occurs, we reserve the right to withdraw the offer.

### Orders and Backorders

Once an order is confirmed and in transit, either to you or from the manufacturer, it cannot be altered or cancelled. You will be informed of backorders at the time of ordering and/or via your sales order confirmation or

invoice. Backorders from domestic suppliers are typically shipped within 2 weeks however imported items may take up to 12 weeks. Once ordered an item will remain on backorder until supplied or cancelled by you and subject to our returns policy. We do not provide updates on the progress of backorders but will supply an ETA on request, however this is an estimate and we will not be bound by it.

### Returns

We do not accept returns, only faulty goods or goods shipped in error may be returned for credit and, in these instances, only with prior authorisation and within 14 days of invoice date. Only items returned unopened, in their original packaging and in a saleable condition will be accepted and must be returned at the sender's expense. Items returned for inspection or repair, either to Medi-Dent or our nominated repairer, must also be returned at the sender's expense. Medi-Dent staff will not collect items from your premises without prior approval from Medi-Dent. Returned items will be credited to your account which may be offset against future purchases however refunds will not be issued. We do not accept returns sent COD.

### Price Matching

We endeavour to match prices on identical items, simply provide a current copy of a competitor's advertised price for verification. We reserve the right to rescind this offer due to limited availability or where it is not commercially viable to fulfil the order.

### Trading Terms

Our terms are 30 days, goods remain the property of Medi-Dent until payment is made in full. We reserve the right to request payment in advance for large, indent or special-order items and will advise at the time of ordering where this is applicable. Equipment purchases must be paid for on receipt of goods into our warehouse as per our customer purchase agreement. We accept payment via EFT, Cheque or American Express, Mastercard and Visa credit cards. Credit card payments incur a surcharge of 1.65% including GST.

### Mirrors

The mirror is an indispensable tool for inspecting the oral cavity, soft tissues, anterior and posterior teeth and for all kind of conservative treatment. An improvement to these standard procedures has been achieved with the introduction of our new "drop shape" mirror which facilitates the control of the soft tissues, better protects the tongue wall and above all it offers a larger view of the superior molar portion and of the oral cavity in general. Furthermore the elongated "drop shape" guarantees a wider reflection surface and therefore a major visibility of the oral cavity.

### Superior Quality Clamps

New clamps, superior quality in all details. The superior quality of the stainless steel and a special temper treatment preserve the elasticity of the new MEDESY clamps and ensure a longer endurance to stress. The anchorage holes are compatible with any type of clamp forceps; the edges are bevelled to offer more comfort during utilisation.

### Forceps & Tweezers: Extraction Forceps

#### Dr. Fabrizio Comella's Forceps

Dr. Fabrizio Comella: since the beginning of his career, as a dentist and researcher, he has been active in the specific field of technical development applied to dental instruments and devices. He is regularly cooperating with MEDESy since 2007 for the study and the realisation of innovative instruments conceived for use in surgery and implantology.

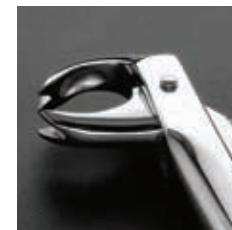

Dr Comella's forceps are the only forceps specifically designed for the extraction of the root and fragments of horizontally impacted third molars. The extraction of impacted third molars deserves special attention for its complexity. Traditional tools and especially the elevators may be very unsafe as they may cause damage to the adjacent nerves and tissues, in the worst case even to the lingual nerve. Dr. Comella's forceps offer a secure and comfortable grip for an easy handling and healthy preservation of the surrounding tissues.

#### Scissor Handle for Lower Wisdom Teeth

Both forceps are specifically designed for the extraction of lower wisdom teeth. Their special shape allows for an easy and safe extraction, even when the patient is unable to fully open their mouth. The forceps must be positioned between tooth # 7 and # 8. After checking if the dental arch is complete evaluate if tooth # 7 is healthy as it is often decayed. Squeeze the handles of the forceps while tilting them simultaneously, the tooth #8 will be levered out presenting the root in the distal position (as you will be able to verify through an x-ray image).

### Forceps & Tweezers: Extraction Forceps

#### Forceps with Blade Beaks

- 1 "Blade Beaks" smoothly penetrate in contact with the root.
- 2 They have a larger contact surface for a secure grip.
- 3 They are delicate with surrounding tissue and minimise the risk of tooth fracture.
- 4 They give better control over the root during the extraction operations.

### Syringes

#### Aspirating Syringes

Excellent quality and unmatched reliability characterise Medesy's range of syringes. In order to satisfy the different needs, the majority of their syringes are equipped with double tip: one suitable for European / METRIC thread needles (EU) and one for American / IMPERIAL thread needles (AM). On demand some of our syringes can also be equipped with an aspiration arrowhead tip.

MED4966/2  
ACTIVE

#### Intraligamental Syringes

The intraligament anaesthesia technique is used for the treatment of individual teeth by means of an injection between the alveolar crest and the tooth root. With this technique the needle is inserted through the gingival sulcus into the periodontal space along the mesial or distal surface of the tooth: the anaesthetic solution must be injected slowly keeping a constant and moderate pressure to facilitate the distribution of the liquid. Contraindicated in presence of deep periodontal pockets and gingival acute infection.

Syringe

#### Medesy-Ject Intraligamental Syringes

Advantages of Intraligamental anaesthesia

- Automatic limitation of the power pressure.
- Anesthetising of a single tooth.
- No numbness of the tongue, lips or cheek.
- Supports regional block anesthesia.
- Simultaneous treatment of teeth in different quadrants.
- Eliminates the risk of haematoma.
- Lower emotional impact on patient.

Suitable for uppers and lowers, just turn the front barrel

# LEVANTE<sup>TM</sup>

by pininfarina

## Levante. Arte Italiana

LEVANTE, new born by PININFARINA creative genius, is MEDESYS original Line of handles.

Like the name of the wind that rises in the central Mediterranean, the cradle of art, thus the new MEDESYS Line stems from the place where the most refined Italian Design resides.

Like the wind may swiftly turn from a light breeze into an overwhelming force, thus the line LEVANTE provides the most delicate comfort and the most secure grip, thanks to the combination of perfect harmony in the forms and in the selected materials.

ELEGANCE, PURITY OF LINES, INNOVATION, distinguishing features and values deeply imprinted in PININFARINA's DNA were applied also for the approach to our LEVANTE project.

## Project

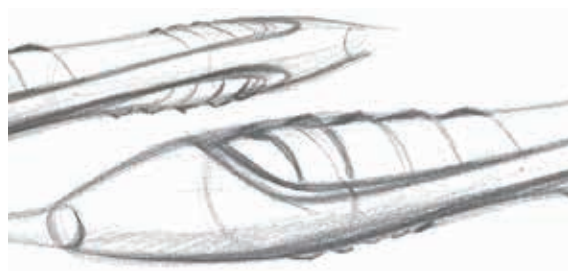

LEVANTE was created and sculpted in the same way the artist shapes its work of art, finely removing the superfluous elements in search for the essence of pure form.

The handle perfectly reflects PININFARINA passion as well as strong expertise in combining elegance of forms with technology, where «innovation is indeed humanised by the design originality».

LEVANTE denotes a double approach:

- A distinct focus on ergonomics through the valorisation of the materials.
- A strong resolution to design an iconic product.

Pure balance between ergonomic efficiency of the grip and delicate design which emphasises smooth lines, perfectly fitting the hand palm while holding.

## Design

PAOLO PININFARINA:  
"PININFARINA has always had the passion for new technologies. Design is the instrument to humanise innovation".

LEVANTE is the perfect expression of the Italian Style: elegance of forms and harmony of proportions, a combination of pure refinement and grace in each single detail.

## Ergonomics

The project scope was to create a new design for the handle that could ensure the preservation of a high standard functionality as well as improving the ergonomics to fulfill the needs for major comfort of the end-user.

A detailed analysis of available materials on the market, on their surface texture and on their specific features was carried out until a superior type of Silicone was selected. A safe material, certified and approved by FDA, fitting also utilization on alimentary sector. On the ergonomics side an accurate study was performed to define the different forces which are required while the dentist hand is holding and using the instrument. Exact data analysis related to the pulling and pushing force and on the rotation capacity, was essential to the creation of a design where the silicone texture increases the grip and maximises the hold of the object even while wearing gloves.

pininfarina

PININFARINA is a design house of international reputation, a symbol of Italian style in the world. With over 80 years of experience, its activities focus on all-around design, product engineering and research.

FERRARI, MASERATI, ROLLS-ROYCE & BENTLEY are among its prestigious customers.

BATTISTA "PININ" FARINA: "You ask me what Italian style means. It means sense of proportion, simplicity and harmony of lines, such that after a considerable time, there is still something which is more alive than just a memory of beauty".

SERGIO PININFARINA: "The beauty of the shape is the result of a deep engagement aimed to reach the highest quality and the design is itself the meeting point between shape and technology, taste and functionality. Nothing seems to be more adapt to the so-called Italian genius than this permanent tension to harmonize beauty and functionality".

An Italian Brand. An international Guarantee

PININFARINA has established itself as a world leader in the car-design and has continued spreading its creative genius to many other sectors, such as nautical, industrial design and architecture; PININFARINA also represents today one of the most prestigious brands, its masterpieces are universally considered as undisputed icons of elegance and purity.

Created by PININFARINA are several Ferrari including the 458 Spider, the torch for the 2006 Turin winter Olympics, the control tower for the new airport of Istanbul, the yacht Princess Y85.

# nerissimo™

**SAVE 20%**  
ON ALL NERISSIMO INSTRUMENTS

**MEDESYS gets dressed for the big occasions.  
NERISSIMO is tailored for just that.**

Imagine an instrument which is the natural extension of your hand. Imagine the perfection of your gesture, feeling relaxed knowing your hold will stay precise and constant in all situations.

Imagine a tool concept perfectly balanced and ergonomic, conceived to simplify your daily work in all its steps, providing the highest efficiency.

Imagine all this and now try NERISSIMO, the brand new line of dental instruments developed by MEDESYS aiming at bringing the best of its skill & experience on the palm of your hand. Refined in all their details, our best instruments change their look into a new black outfit, thanks to the innovative DLC coating (Diamond Like Carbon).

A special biocompatible coating whose unique characteristics ensure superior wear resistance, efficiency and reliability as well as favouring a better visibility during routine operative dentistry, de-facto eliminating reflections and highlighting the contrast with tissue and liquids of the oral cavity.

- NERISSIMO is much more than a colour.
- NERISSIMO is the style and elegance of high level performances.
- Are you ready for a change of look (like this)?

**DLC coating: the force of carbon and hardness of a diamond.**

DLC coating provides outstanding performances. A very low temperature during the coating transfer process, the friction coefficient, one of the lowest for the existing coating technologies, the elevated ratio H/E (Hardness/Elasticity Modulus), indicator of excellent wear and stress resistance, just to outline some of the main features which make this treatment at cutting edge of today's coating technology.

**DLC FEATURES AND BENEFITS:**

- **Exceptional hardness** for a maximum resistance to abrasion for cutting instruments: **PERFECT SHARPNESS** guaranteed over time.
- **Low friction coefficient** provides high fluidity during the procedure. The result is an excellent non-stick coating that prevents material residues on the surface.
- **Great endurance to corrosion** creating a real barrier against chemical agents.
- **Unaltered precision** of the instrument, since the DLC layer bonds and compacts completely with the stainless steel.
- **Optimal biocompatibility** suitable for the dental procedure as DLC has hypoallergenic proprieties, hindering medical rejections and tissue damages.
